Memo to File:

Re: Montello Clay Mine
Interstate Brick Company
Box Elder County, Utah
ACT/003/004

BWB

On May 10, 1977, Brian Buck inspected the proposed site for the Interstate Brick, Montello operation. The location is in an unnamed drainage on the southwest slope of the Grouse Creek Mountains. It is a very remote area and reachable by already existing dirt roads.

The drainage is ephemeral in nature. The vegetation is sparse, consisting of various grasses and sagebrush.

BRIAN W. BUCK
